

ANALIZA MECANISMELOR INFORMAȚIONALE

Una dintre marile probleme ale umanității, poate cea mai mare, este îndoiala sau negarea existenței lui Dumnezeu. Teoria fractalilor algebrici generată de mine în 30 de ani, permite demonstrarea matematică ușor de urmărit pentru oricine indiferent de profesie, că DUMNEZEU EXISTĂ

PROPRIETATILE INFORMATIE

La inceput vor fi prezentate detaliile necesare

Acestea permit abordarea informatiei circulate „cardul de gaste”

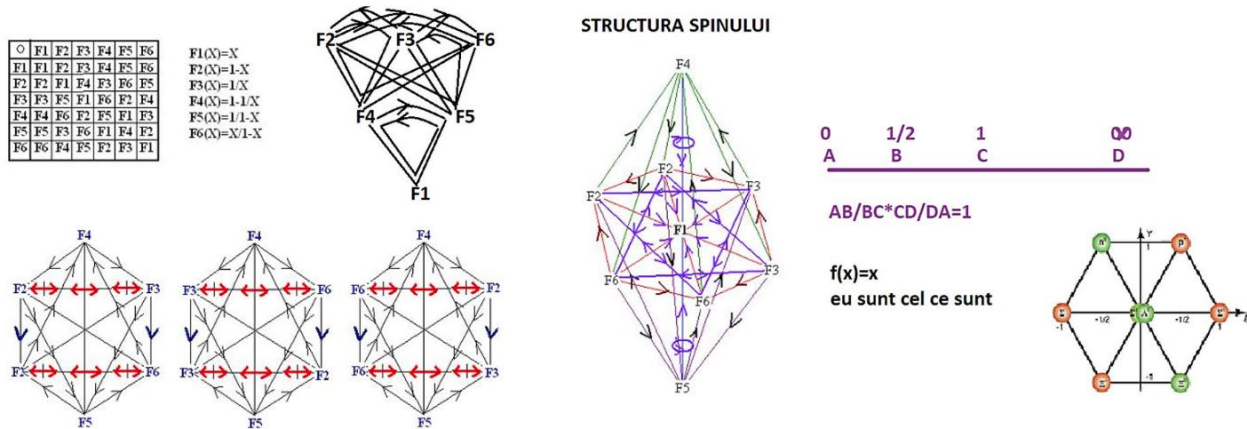

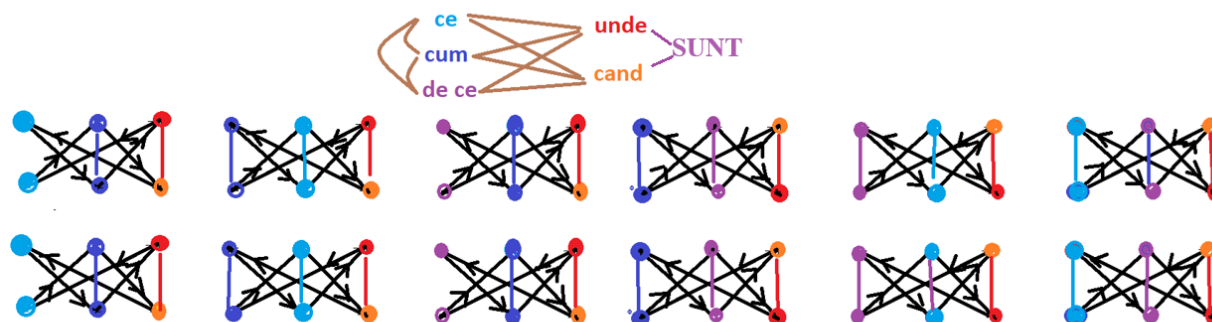

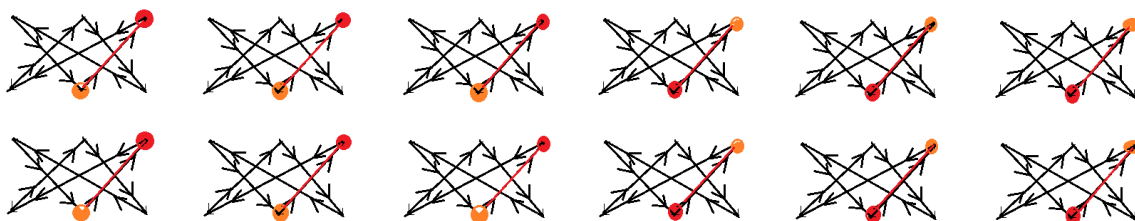

Figura 1. Spinul și tabelul de compunere

[illegible]

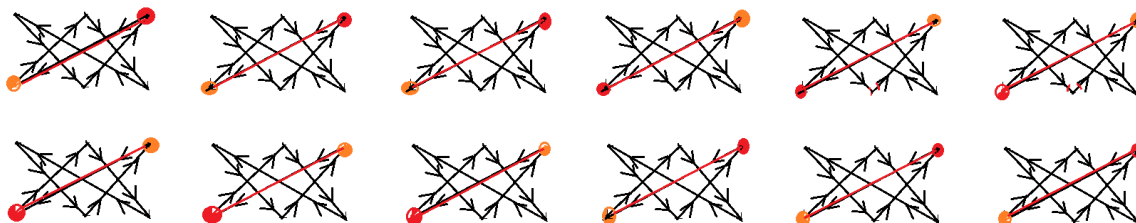

modalitatile de desfacere a unei diagrame unicursale de pe cardul de gaste in 12 variante ce descriu 12 comportamente

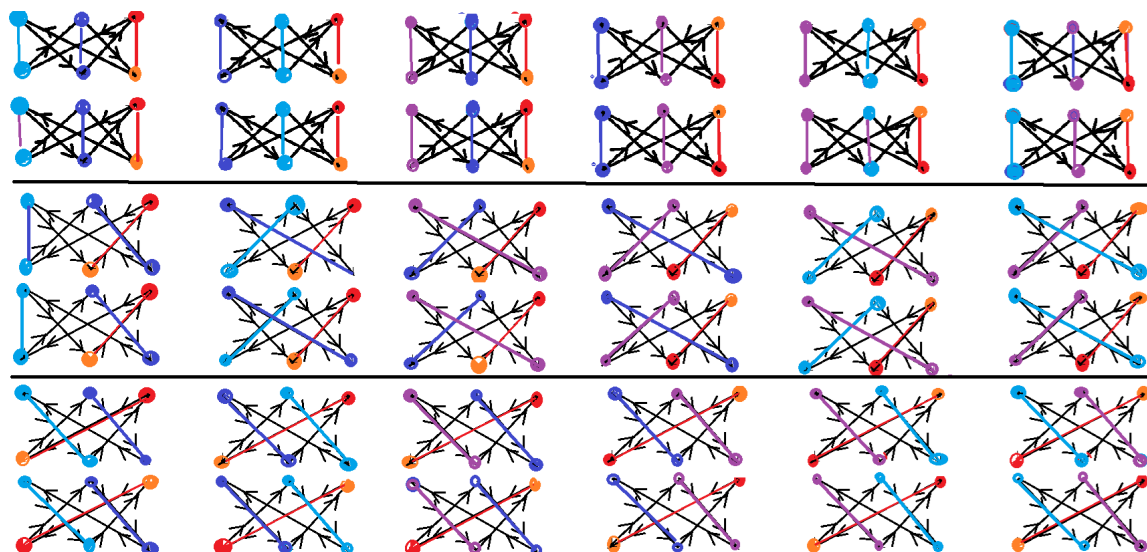

diagrame unicursala este reprezentata cu negru, dimensiunile informationale sunt reprezentate cu negru

diagonala mica cuprinde intrebarile unde, cand

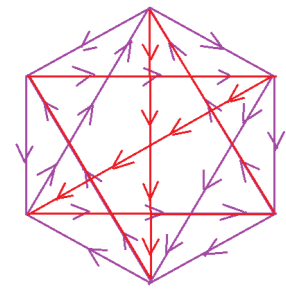

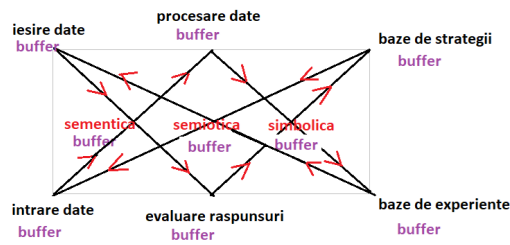

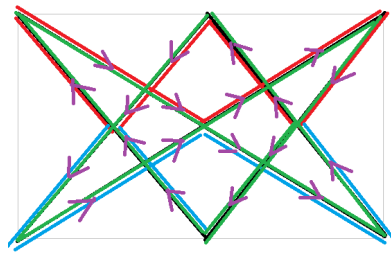

diagonala mare cuprinde intrebarile unde, cand

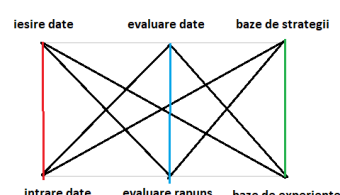

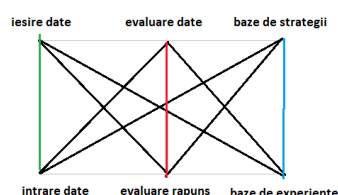

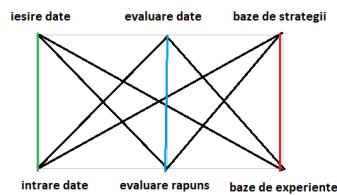

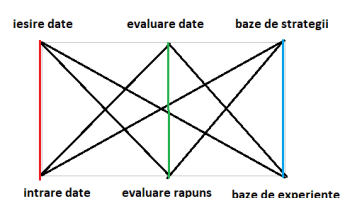

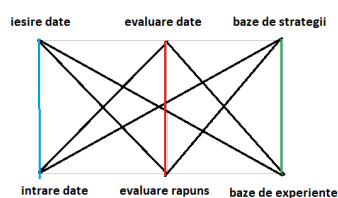

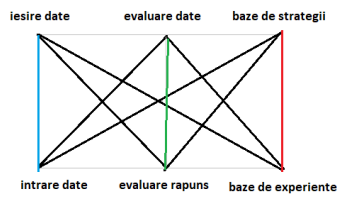

Trecerea unei diagrame unicursale ce devine un fractolon, este prezentata mai jos:

Procedura va fi utilizata in diverse aplicatii ulterioare

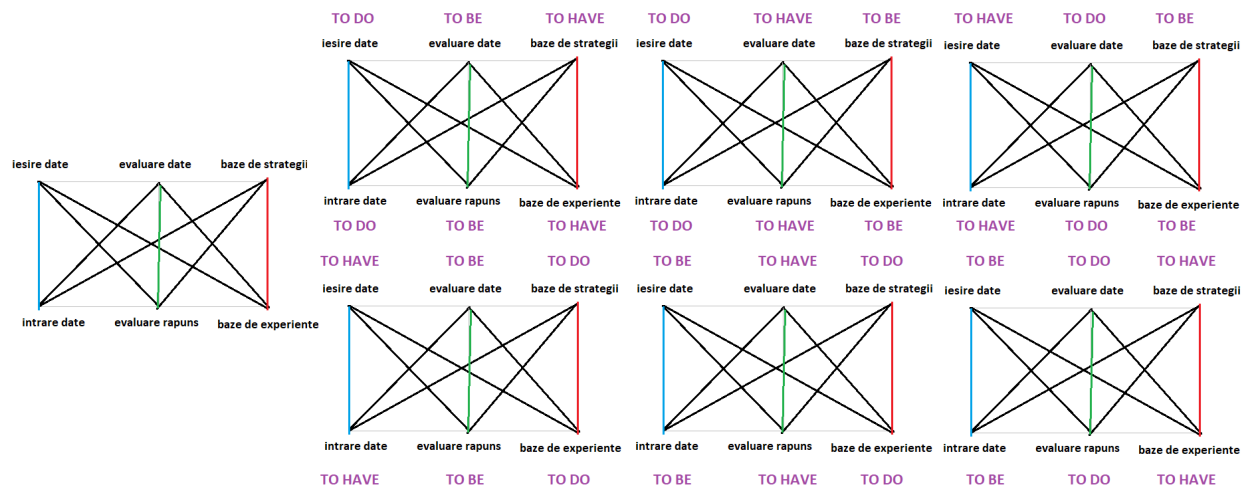

Această procedură deschide orizonturi uimitoare, deoarece fractolonii sunt semantici si permit transmiterea de informații complexe. De la trei linii paralele, la diagramele unicursale, până la informațiile complexe, ne arată modul de manifestare in comunicare cu universul a lui DUMNEZEU

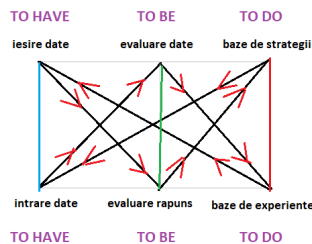

PROFESIILE MEDIULUI

datorita faptului ca liniile rosii au fost pe pozitii fixe, in timp ce celelalte erau pe pozitii varabile, vom avea in final 36 de variante de structurare

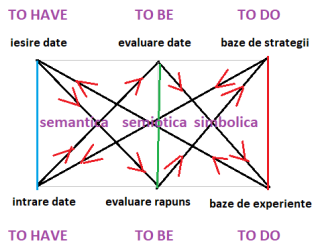

LINIILE COLORARE REPREZINTA: TO DO; TO HAVE, TO BE, si pot ocupa pozitii diferite. per total ne descriu cum actioneaza tehnologiile naturii

UN EXEMPLU DE STRUCTURA TEHNOLOGICA

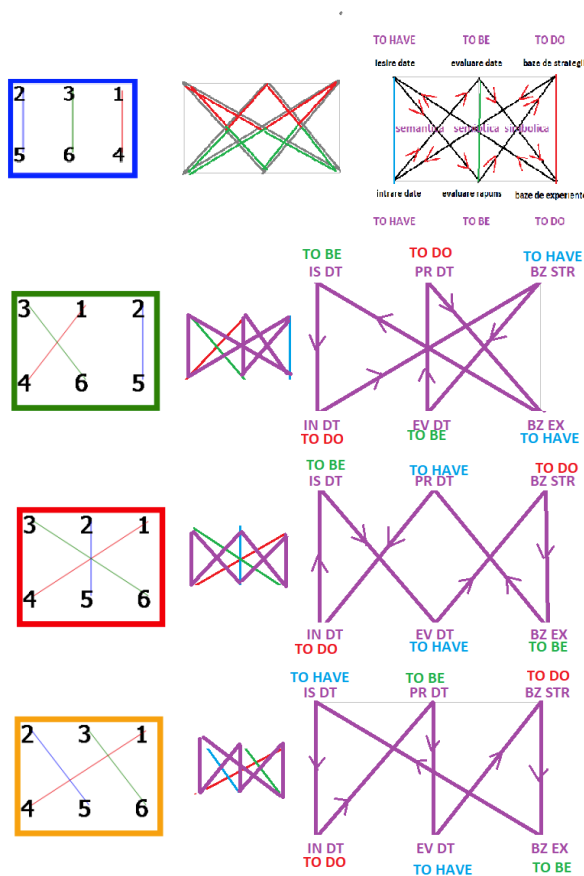

pe intrarea de date se cuantifica ce avem;
 pe evaluarea de date se cuantifica cum suntem (nivel de instruire);
 pe baza de experiente se cuantifica ce experienta avem;
 pe iesirea de date se cuantifica ce am produs in final;
 pe evaluare raspuns se cuantifica cum s-a apreciat calitatea produsului;
 pe baza de strategii se cuantifica ce avem de facut mai departe

introducand nodurile intermediare: semantica, semiotica simbolica obtinem urmatoarele
 "ce avem" conduce la "ce inseamna ce avem", care conduce la "nivelul de instruire avut"
 "cum suntem" conduce la "simbolica" (brandul), care conduce la "experienta avuta"
 'experienta avuta' conduce la "semnificatia" acestia (diploma), care conduce la "brandul institutiei
 ce a acordat diploma
 "brandul institutiei" conduce prin "semantica" la increderea acordata institutiei
 "increderea acordata institutiei" conduce prin "simbolica" la rankingul institutiei", care conduce
 ulterior la "nivelul de atractivitate" al institutiei
 "nivelul de atractivitate" conduce prin "semnificatie" la "pozitia castigata ulterior"

Varietatea optiunilor generate se poate urmări mai jos:

Concatenarea pe trei butoane expusă pe situl <https://qdl-patterns.web.app/patterns> generează strategii în trei etape, dacă luăm secvențele orizontale de paternuri similare, urmate de paternurile adiționale. Dacă luăm șirurile verticale, descoperim etapele de realizare punct cu punct, a strategiilor.

Luând în studiu modelarea expusă pe situl <https://qdl-crisis2.web.app/simpleCube> la hexagonul 1, descoperim un număr de puncte necomplete, deci nu există încă soluții la probleme, însă există o diagonală completată. Pe de altă parte toate conținuturile sunt preluate de pe situl concatenării pe trei butoane. Extraordinar este conținutul punctelor, ce arată etapele de trecere de la condiții dificile, către retragerea oamenilor din natura ce se va putea regenera.

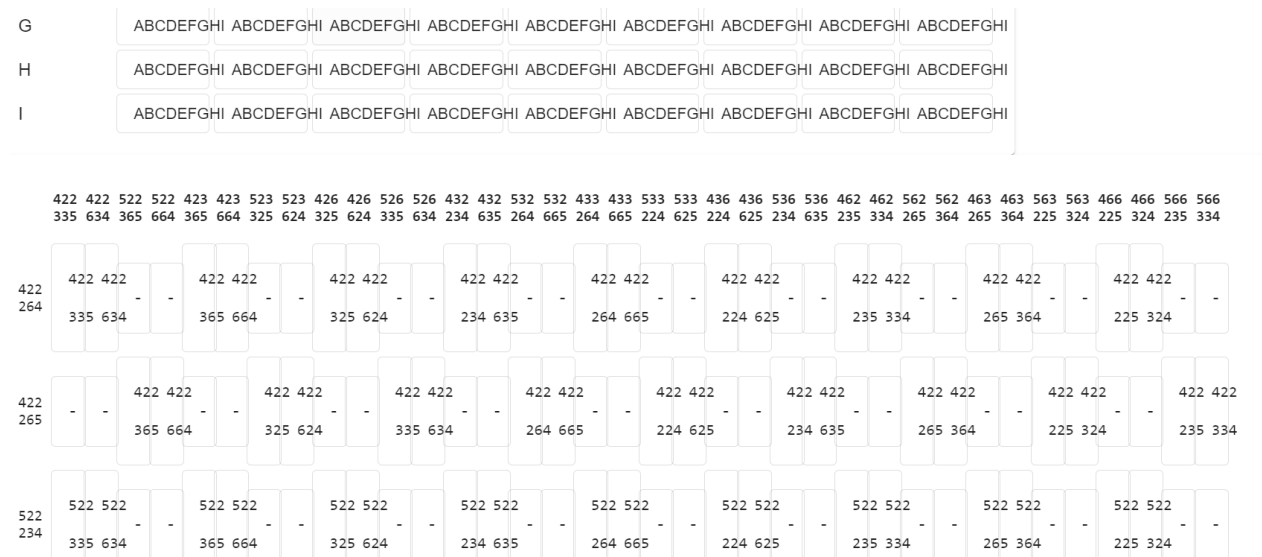

Arborele sefirotic odată introdus in modelare, pe aceeași diagonală, de pe hexagonul 3, dar luat in sens invers, de la punctul din dreapta sus, către punctul din dreapta jos, pe al doilea hexagon, ne dă profilul psihologic al lui Hristos, dar arata si faptul ca Hristos venea din viitor <https://gdl-education.web.app/simpleCube>. Paradoxal cele doua aplicații au aceleași două conținuturi la extremitățile diagonalei principale.

Concatenarea pe doua butoane este de asemenea complexă, dar descifrabilă, deși nu are decât seturi de cate trei puncte pe drepte paralele, ce se transforma imediat in diagrame unicursale.

Concatenarea pe două butoane generează conectoame <https://www.youtube.com/watch?v=HA7GwKXfJB0&t=342s>

Concatenarea pe un buton este prezentata mai jos:

Diagrama prezintă un hexagon cu săgeți roșii și negre care reprezintă interacțiunile dintre șapte concepte de dezvoltare personală:

- IN_DT::where:to_have** (deasupra): experiența practică de acțiune echilibrată și optimizată
- IS_DT::where:to_be** (dreapta): prezent și eficient la nevoie
- BZ_STR::what:to_do** (jos dreapta): acțiunile potrivite rezolvării momentelor dificile

Pentru informația circulantă compactată putem identifică două variante comportamentale
-prima varianta in care paternurile de pe linia de jos a pachetului se repeta pe verticala, linia de sus având o variație vizibila

- a doua unde pe orizontala variază linia de jos

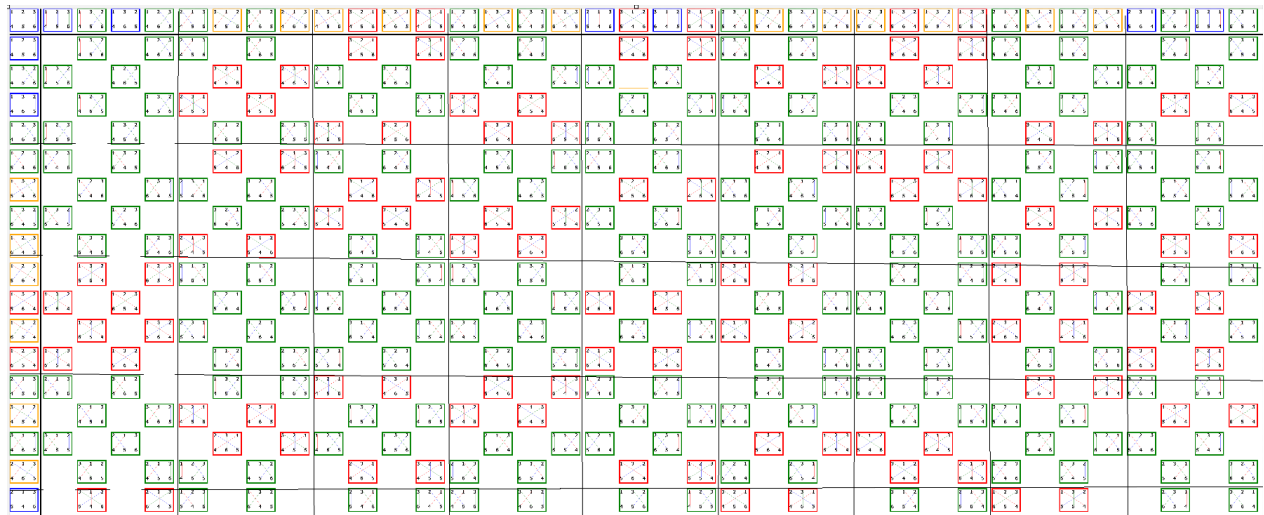

Cele doua tipuri de variație crează spațiul coerent al informației specific informației circulante, ce se regăsește in concatenarea pe un buton si pe doua butoane.

In general informația circulanta compacta repera același patern, fără variație pe verticala sau orizontala. Aceasta observație ne conduce la concluzia existentei a doua fenomene: dinamice sau statice si de context pentru fenomenele specifice genomului universului

Plecând de la structura informațională a câmpului magnetic

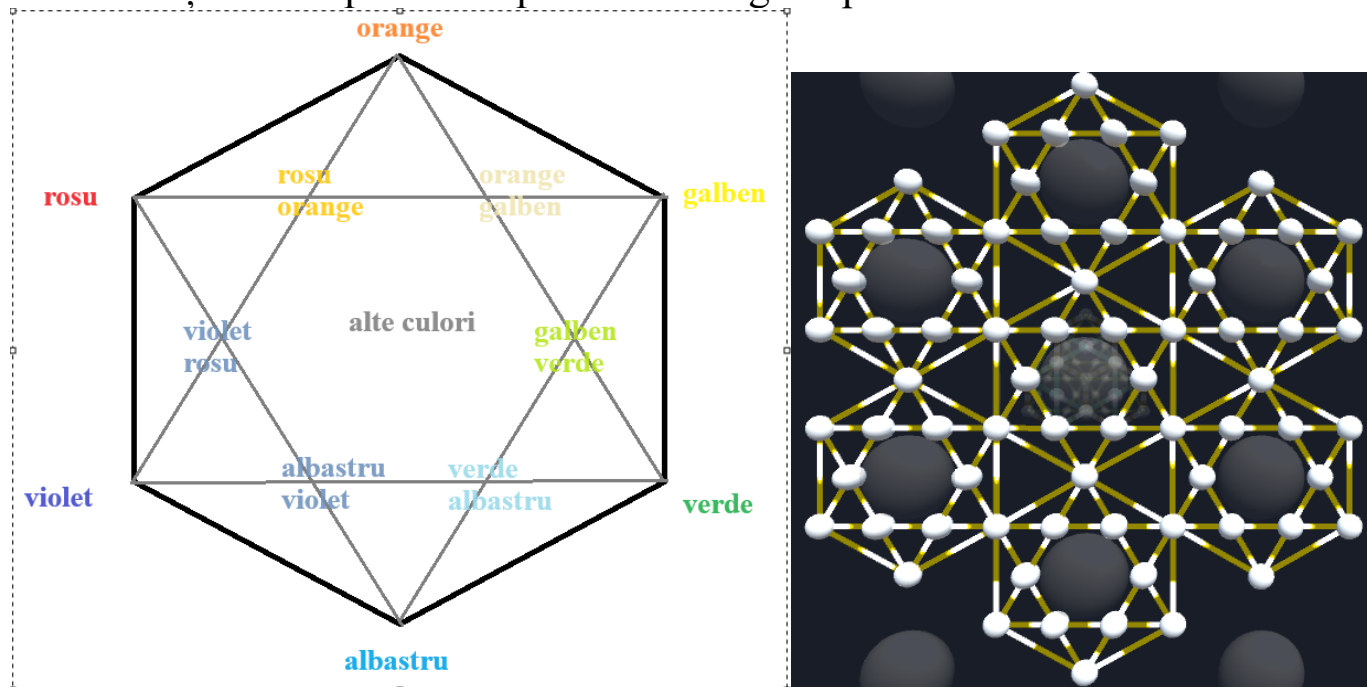

Trecând către câmpul electric

Facem si trecerea de la diagrama unicursală către fractoloni

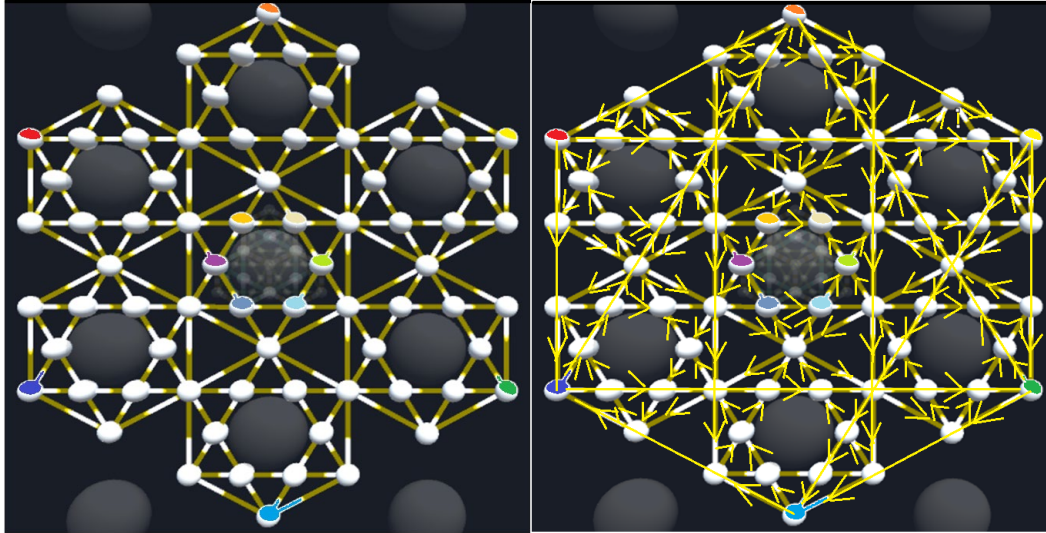

In cazul luminii descompunerea fotonilor in cate 7 fotoni cu componente informaționale semantice, capabili să transmită informații complexe mai departe.

Culorile **roșu**, **orange**, **galben**, **verde**, **albastru**, **violet**, generează celelalte culori si informațiile transportate după anumite reguli specifice.

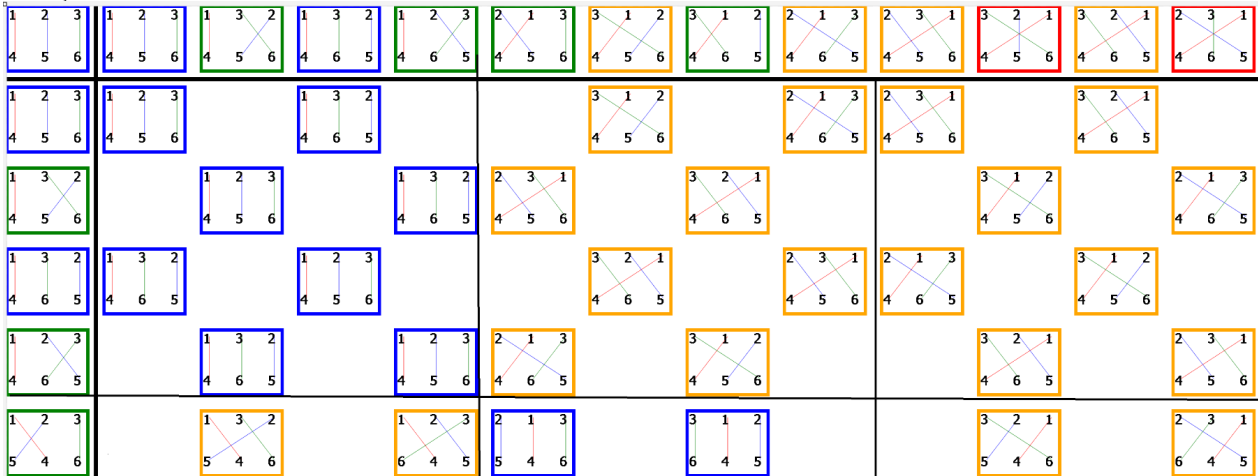

Combinățiile de culori generează alte culori

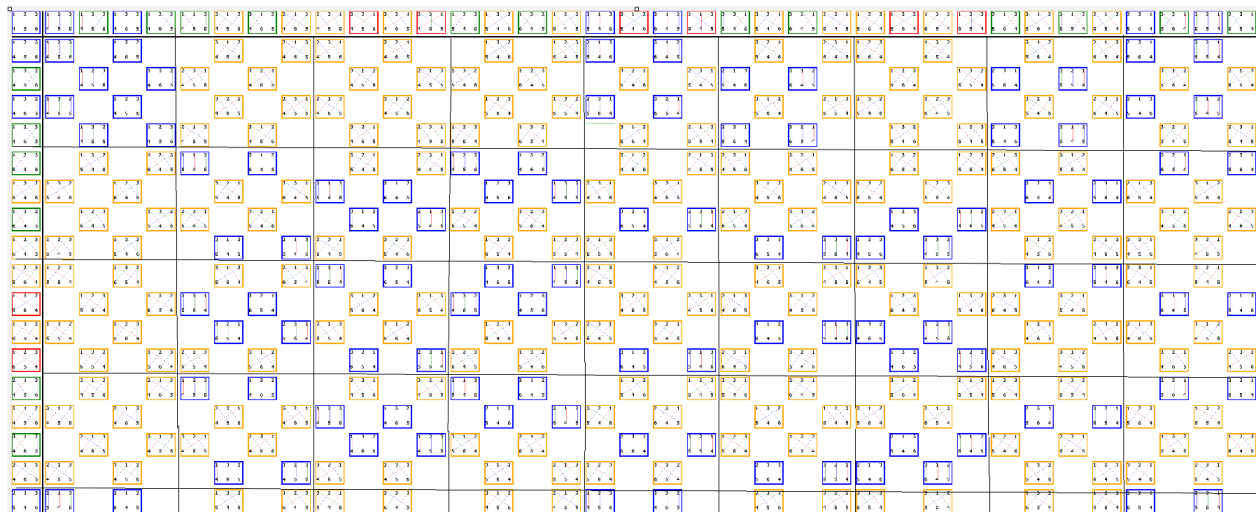

Culorile au semnificații semantice și direcții de acțiune putând fi diferențiate în nuanțe pe fiecare nod din rețea.

Diferențierea este semantică, fiecare nod răspunzând la una dintre întrebările: sunt, ce, cum, de ce, unde, când, ce sunt generate de automorfismele drepte proiective.

După cum putem vedea din figura de mai jos, electromagnetismul „deci lumina” se poate prezenta sub forme foarte diferite, ceea ce înseamnă conținuturi informaționale diferite ce se pot conecta între ele în moduri diferite. Aceasta înseamnă că universul gândește, deci Dumnezeu există și EL a creat universul. Se mai poate urmări și actul creației pornind de la colțul din stânga sus și împrăștiindu-se pe toate direcțiile în continuare. Fiecare element albastru sau galben, are diferite modele de manifestare, ceea ce înseamnă portofolii de soluții complexe. Aceasta generează diversitate și biodiversitatea armonizată și funcțională

Aplicații ale teoriei pot fi urmărite pe un număr de situri:

REALIZAREA HOLOGRAMEI INFORMAȚIONALE

Există două dimensiuni de realizarea a hologramei informaționale. Prima este data de dimensiunea pe nivele de granulație, a doua este data de modul de alcătuire a structurii informaționale.

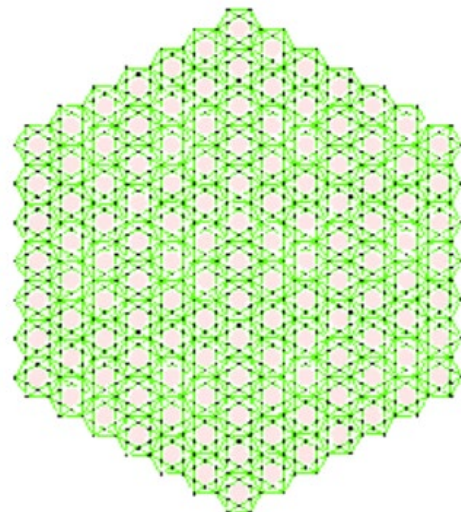

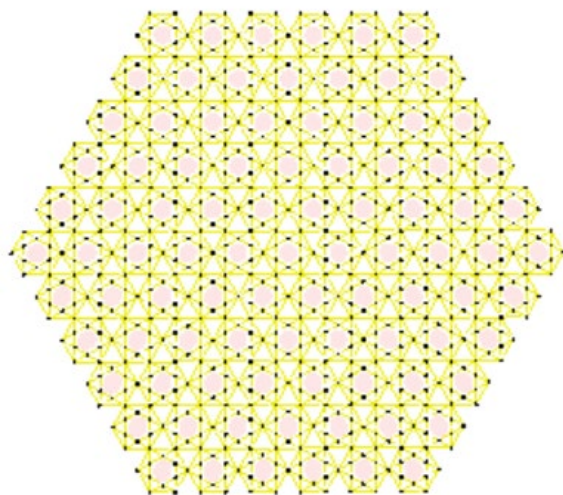

Dimensiunea granulației este generată de raportul dintre sustenabil și metabolic. Aceasta depinde de raportul dintre comunități și rețele în realizarea circulației informaționale

La fiecare nivel si structura de date, cantitatea de informație ceste exponențial. Exista teoretic 8 nivele de granulare a informației la care se adaugă tripli fractoloni, ce generează împreună baza de informații primare necesare structurilor informaționale vii sociale. Acestea se multiplica in continuare, generând structura ecosistemica, genetica, si mergând pana la structura galactică.

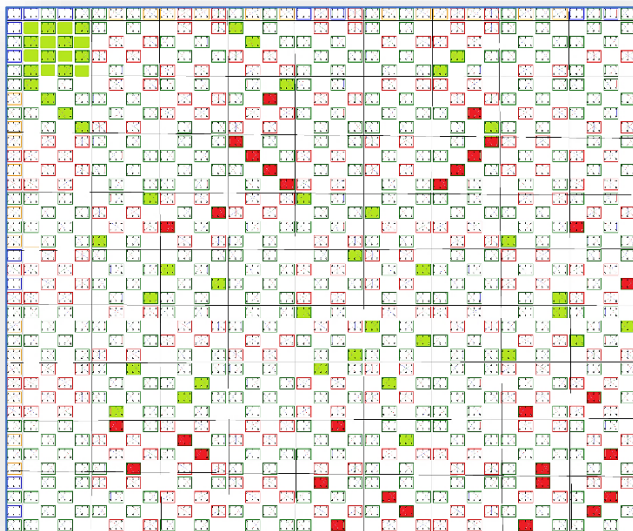

Totul se duce până la genomul universului, care se vede ca a fost creația lui DUMNEZEU. Se poate arata complet cum functioneaza acest genom pe aplicatia <http://harapalb66.pythonanywhere.com/> user: genom parola: 1234. Aceasta permite traducerea directă in fractoloni a conținuturilor.

DESCIFRAREA GENOMULUI UNIVERSULUI

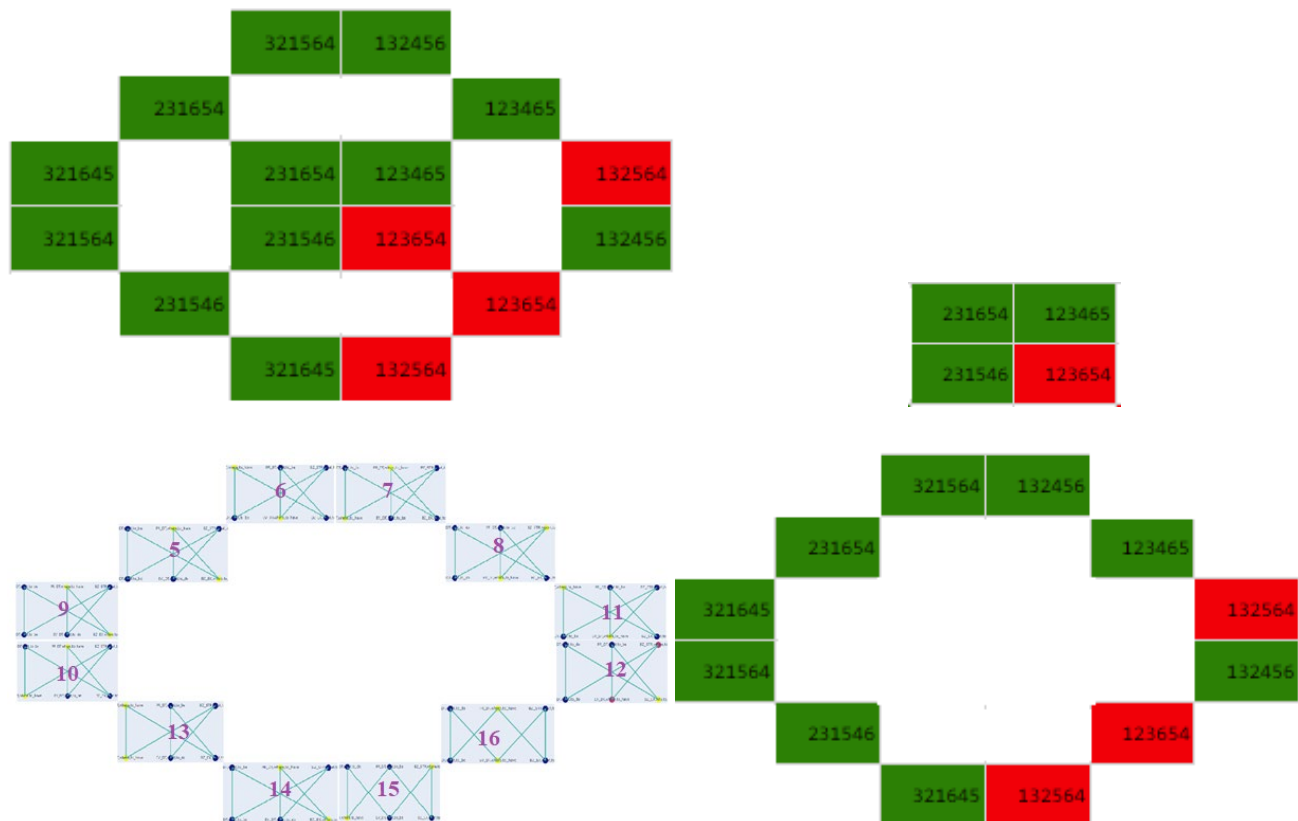

Genomul universului este o alta aplicație care arată modul de funcționare a universului inteligent si sensibil. <http://harapalb66.pythonanywhere.com/>

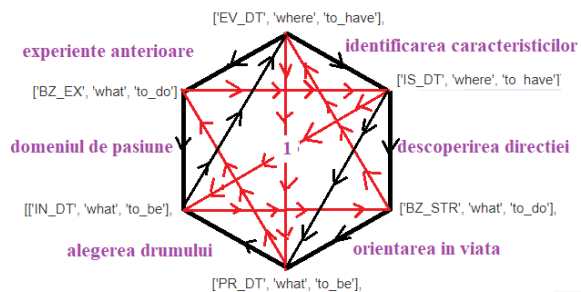

O aplicație a particulara este data de „gravitație” . traducerea semantica prin cheile de descifrare specifice, arată atracția dintre elementele traduse semantic.

focusarea pe un singur element constitutiv ne permite analiza mecanismelor de atracție specifice. Se observă existența unui nucleu si a unul context extern de acțiune:

Fiecare componentă este tratată separat si descifrată semantic in limbaj uman

Surprinzător este faptul ca in locul unor legi ale gravitației si atracției universale, cu exprimare mecanicistă, descoperim unele legi de atracție socială, după introducerea cheilor de descifrare. De exemplu evaluarea de date (EV DT, what to do) proiectata peste ieșirea de date (IS DT, what to be) generează nivelul si rolul social, privit din perspectiva umană. Aceasta observație ne conduce la biblie, unde se afirma ca „omul este creat după chipul si asemănarea lui Dumnezeu

O confirmare a acestei teorii ar trebui să apară din analiza electromagnetismului, unde exista polarizări si atracție-respingere între poli, dar exista si orientări fixe pe câmpuri si linii de tensiune. Exemplele de mai sus confirmă aceste ipoteze si deschid câmpuri de analize mai profunde.

Remarcabil este faptul ca puse pe cheile de descifrare date de fractoloni, se poate înțelege complexitatea prin utilizarea experienței umane directe. Acesta este apanajul fractalilor algebrici, care sunt semantici si permit evaluarea inefabilului nu doar a măsurabilului.

Totdeauna ne-au fascinat începuturile si „geneza”. Biblia arata doua începuturi: „La început a fost lumina” si „La început a fost cuvântul”. Fractalii algebrici generează o structura ce poate fi descifrată.

Informația circulantă compactată

Informația circulantă compactată generează structuri de permutări in cadrul liniilor si coloanelor. Fiecare cluster conține funcționalități separate ce se relevă in structuri de colaborare de genul „pălăriilor gânditoare”

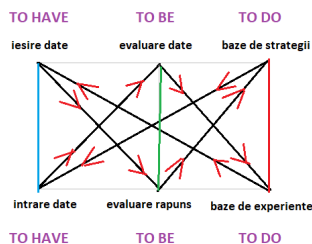

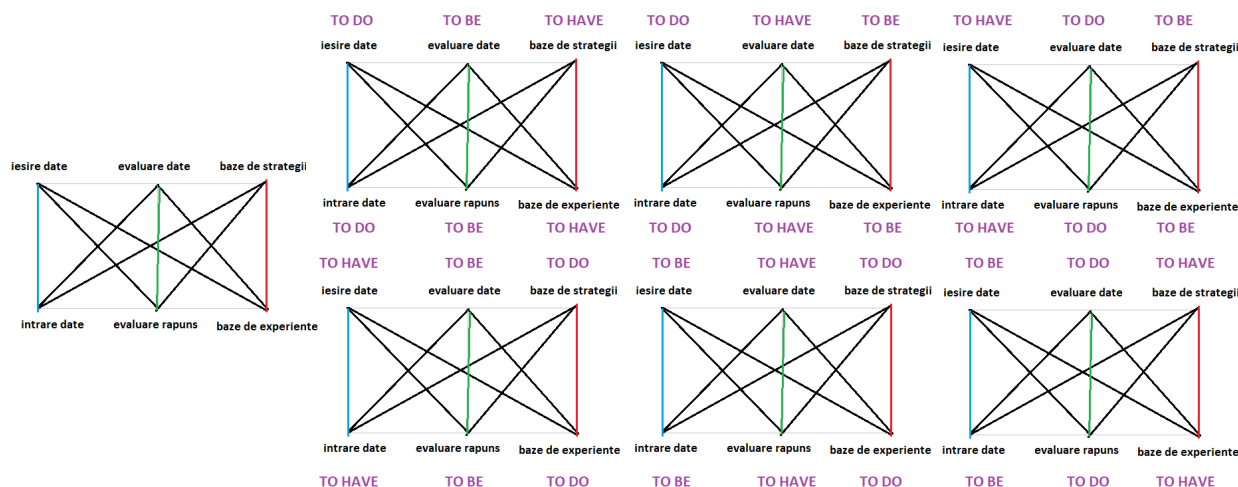

Exemplu de pachet funcțional cu etape organizatorice ce generează limbajul de programare

Una dintre marile probleme ale umanității, poate cea mai mare, este îndoiala sau negarea existenței lui Dumnezeu. Teoria fractalilor algebrici generată de mine în 30 de ani, permite demonstrarea matematică ușor de urmărit pentru oricine indiferent de profesie, că **DUMNEZEU EXISTĂ**
PROFESIILE MEDIULUI

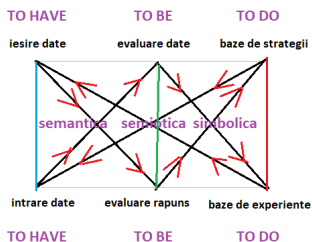

datorita faptului ca liniile rosii au fost pe pozitii fixe, in timp ce celelalte erau pe pozitii variabile, vom avea in final 36 de variante de structurare

LINIILE COLORARE REPREZINTA: TO DO; TO HAVE, TO BE, si pot ocupa pozitii diferite. per total ne descriu cum actioneaza tehnologiile naturii

UN EXEMPLU DE STRUCTURA TEHNologica

pe intrarea de date se cuantifica ce avem;
 pe evaluarea de date se cuantifica cum suntem (nivel de instruire);
 pe baza de experientie se cuantifica ce experientia avem;
 pe iesirea de date se cuantifica ce am produs in final;
 pe evaluare raspuns se cuantifica cum s-a apreciat calitatea produsului;
 pe baza de strategii se cuantifica ce avem de facut mai departe

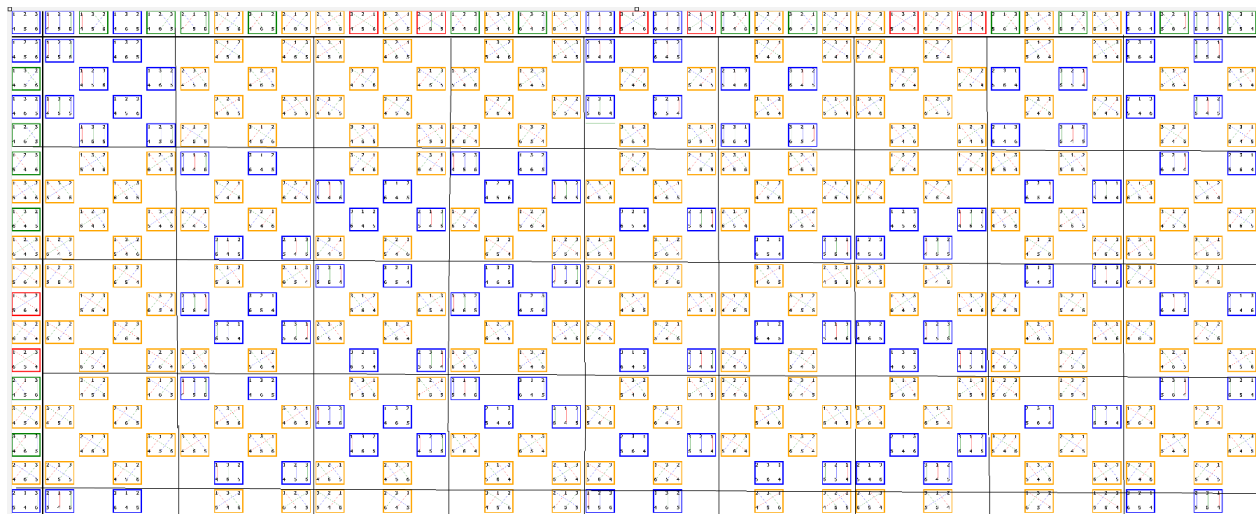

introducand nodurile intermediare: semantica, semiotica simbolica obtinem urmatoarele
 "ce avem" conduce la "ce inseamna ce avem", care conduce la "nivelul de instruire avut"
 "cum suntem" conduce la "simbolica" (brandul), care conduce la "experientia avuta"
 "experientia avuta" conduce la "semnificatia" acestia (diploma), care conduce la "brandul institutiei
 ce a acordat diploma
 "brandul institutiei" conduce prin "semantica" la increderea acordata institutiei
 "increderea acordata institutiei" conduce prin "simbolica" la rankingul institutiei, care conduce
 ulterior la "nivelul de atractivitate" al institutiei
 "nivelul de atractivitate" conduce prin "semnificatie" la "pozitia castigata ulterior"

COMPONENTELE LUMINII

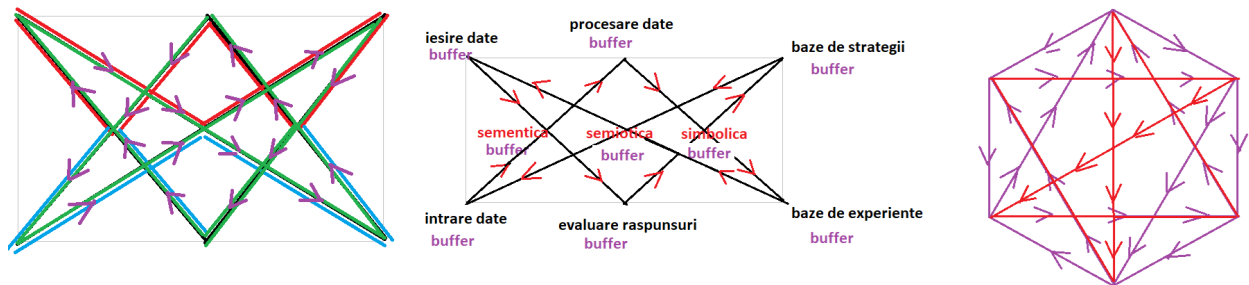

PARTICULELE ELEMENTARE CU GRAVITAȚIE

Plecând de la structura informațională a câmpului magnetic

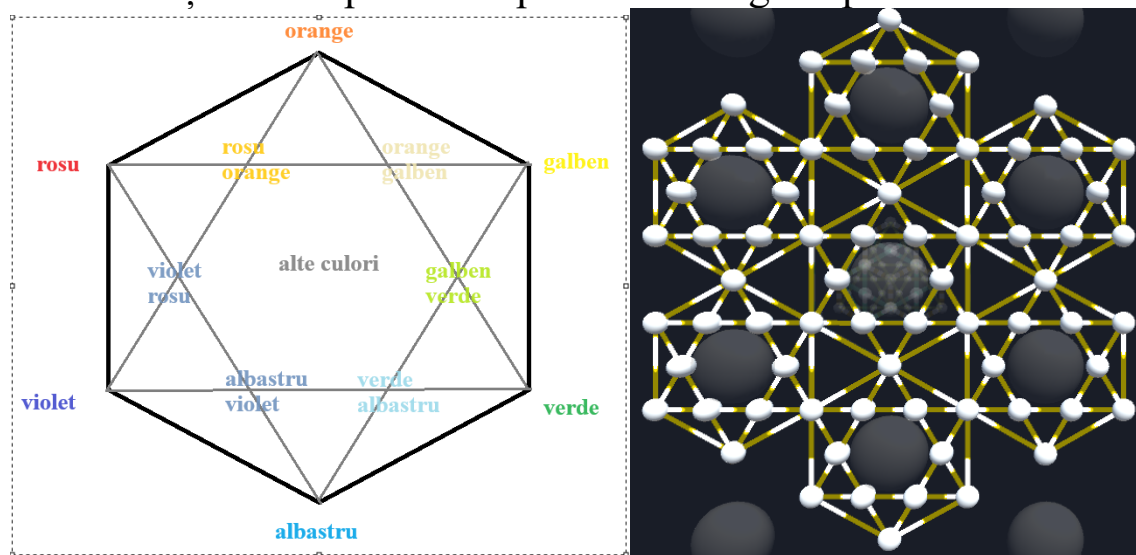

Trecând către câmpul electric

Facem si trecerea de la diagrama unicursală către fractoloni

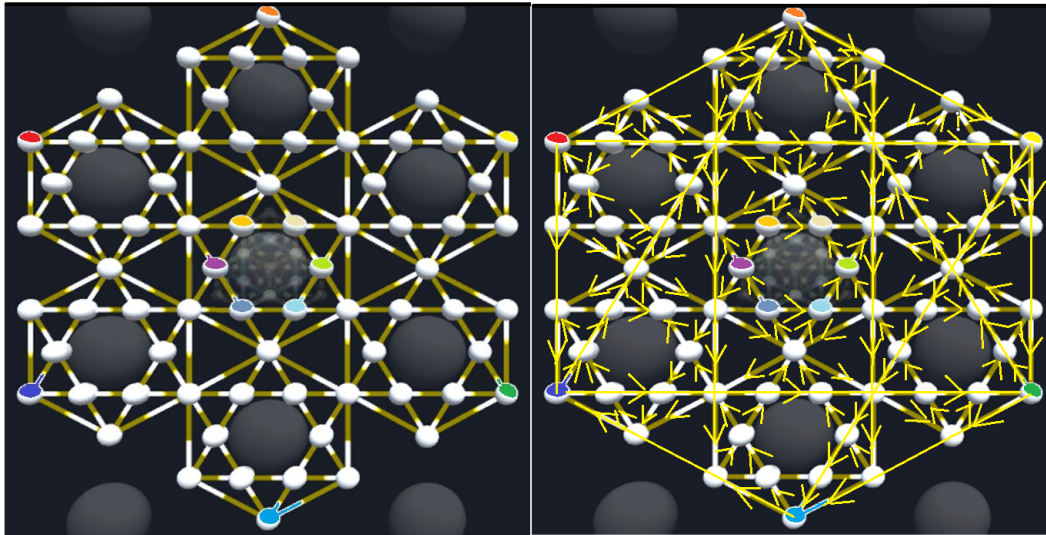

In cazul luminii descompunerea fotonilor in cate 7 fotoni cu componente informaționale semantice, capabili să transmită informații complexe mai departe.

Culorile **roșu**, **orange**, **galben**, **verde**, **albastru**, **violet**, generează celelalte culori si informațiile transportate după anumite reguli specifice.

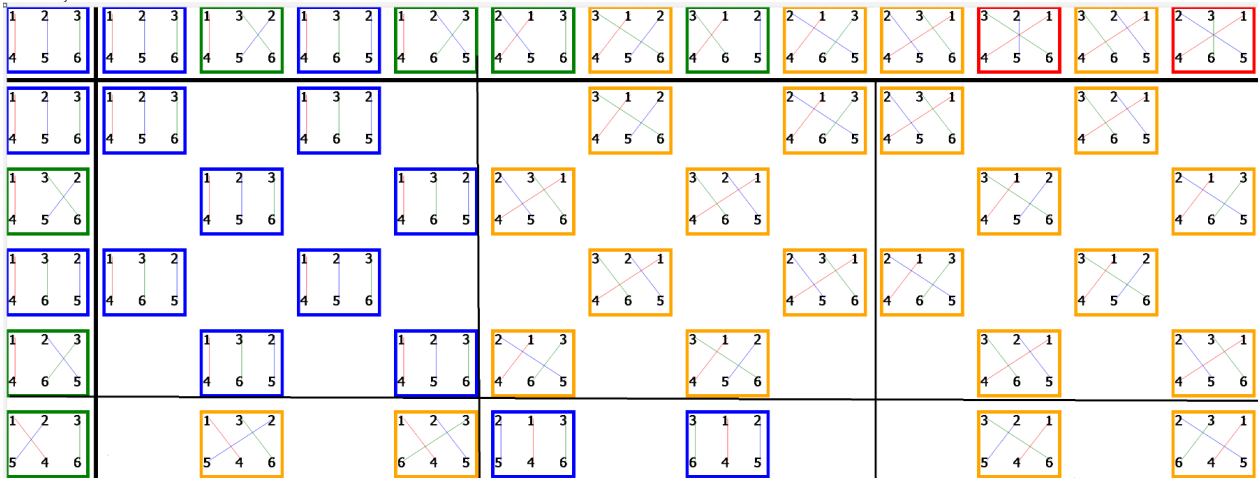

Combinațiile de culori generează alte culori

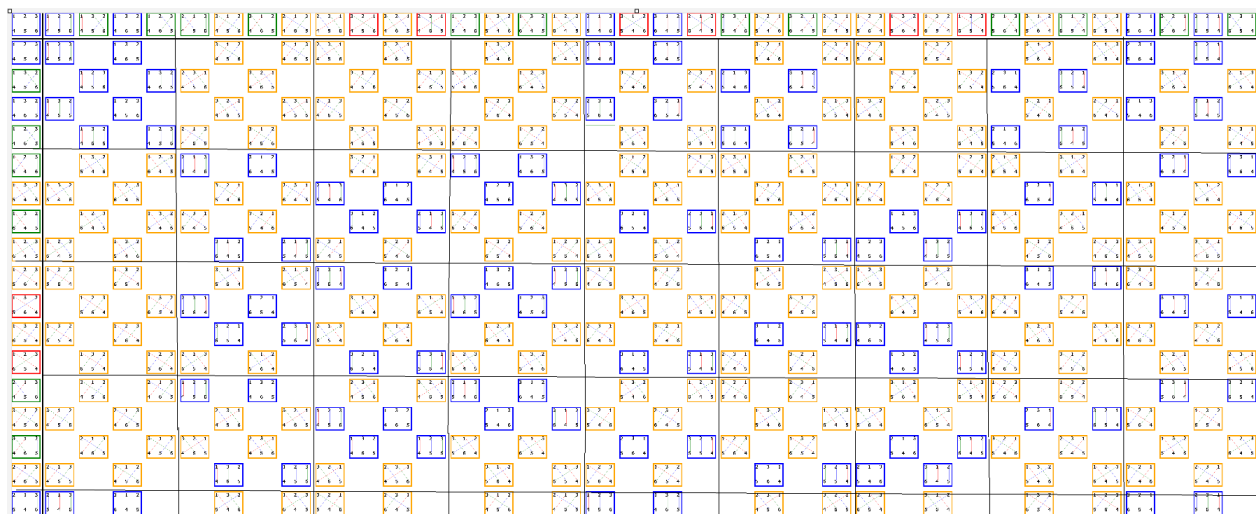

Culorile au semnificații semantice și direcții de acțiune putând fi diferențiate în nuanțe pe fiecare nod din rețea.

Diferențierea este semantică, fiecare nod răspunzând la una dintre întrebările: sunt, ce, cum, de ce, unde, când, ce sunt generate de automorfismele drepte proiective.

După cum putem vedea din figura de mai jos, electromagnetismul „deci lumina” se poate prezenta sub forme foarte diferite, ceea ce înseamnă conținuturi informaționale diferite ce se pot conecta între ele în moduri diferite. Aceasta înseamnă că universul gândește, deci Dumnezeu există și EL a creat universul. Se mai poate urmări și actul creației pornind de la colțul din stânga sus și împrăștiindu-se pe toate direcțiile în continuare. Fiecare element albastru sau galben, are diferite modele de manifestare, ceea ce înseamnă portofolii de soluții complexe. Aceasta generează diversitate și biodiversitatea armonizată și funcțională

Aplicații ale teoriei pot fi urmărite pe un număr de situri:

Detaliile de înțelegere a teoriei ce a condus la aceste rezultate pot fi urmărite în continuare.

REALIZAREA HOLOGRAMEI INFORMAȚIONALE

Există două dimensiuni de realizarea a hologramei informaționale. Prima este data de dimensiunea pe nivele de granulație, a doua este data de modul de alcătuire a structurii informaționale.

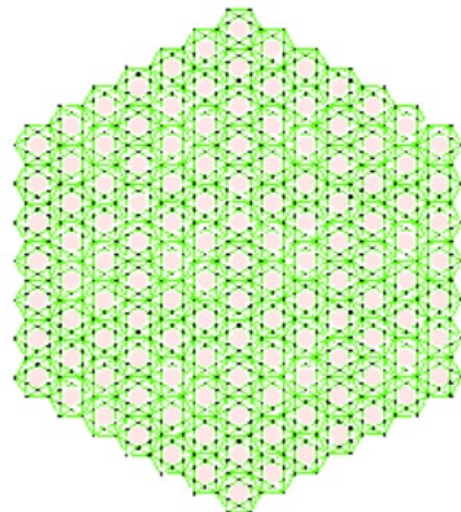

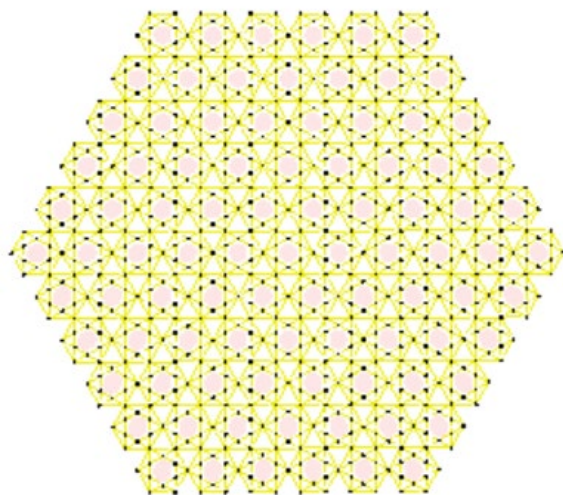

Dimensiunea granulației este generată de raportul dintre sustenabil și metabolic. Aceasta depinde de raportul dintre comunități și rețele în realizarea circulației informaționale

La fiecare nivel si structura de date, cantitatea de informație este exponențială. Există teoretic 8 nivele de granulare a informației la care se adaugă tripli fractoloni, ce generează împreună baza de informații primare necesare structurilor informaționale vii sociale. Acestea se multiplică în continuare, generând structura ecosistemică, genetică, și mergând până la structura galactică.

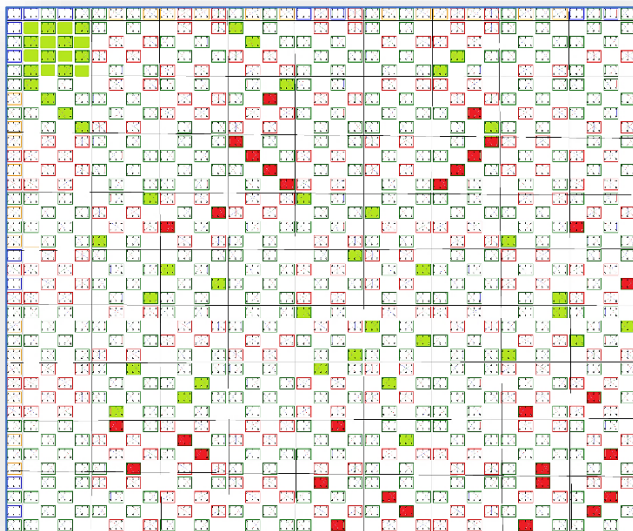

Totul se duce până la genomul universului, care se vede ca a fost creația lui DUMNEZEU. Se poate arata complet cum funcționează acest genom pe aplicația <http://harapalb66.pythonanywhere.com/> user: genom parola: 1234. Aceasta permite traducerea directă în fractoloni a conținuturilor.

DESCIFRAREA GENOMULUI UNIVERSULUI

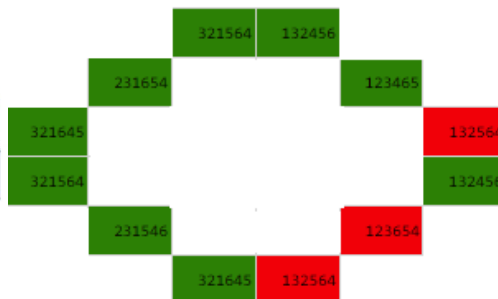

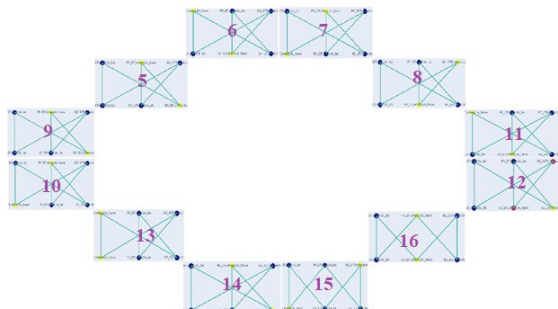

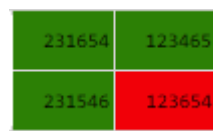

Genomul universului este o altă aplicație care arată modul de funcționare a universului inteligent și sensibil. <http://harapalb66.pythonanywhere.com/>

O aplicație a particulară este data de „gravitație”. traducerea semantică prin cheile de descifrare specifice, arată atracția dintre elementele traduse semantic.

focusarea pe un singur element constitutiv ne permite analizarea mecanismelor de atracție specifice. Se observă existența unui nucleu și a unui context extern de acțiune:

Fiecare componentă este tratată separat si descifrată semantic in limbaj uman

Surprinzător este faptul ca in locul unor legi ale gravitației si atracției universale, cu exprimare mecanicistă, descoperim unele legi de atracție socială, după introducerea cheilor de descifrare. De exemplu evaluarea de date (EV DT, what to do) proiectata peste ieșirea de date (IS DT, what to be) generează nivelul si rolul social, privit din perspectiva umană. Aceasta observație ne conduce la biblie, unde se afirma ca „omul este creat după chipul si asemănarea lui Dumnezeu

O confirmare a acestei teorii ar trebui să apară din analiza electromagnetismului, unde exista polarizări și atracție-respingere între poli, dar exista și orientări fixe pe câmpuri și linii de tensiune. Exemplele de mai sus confirmă aceste ipoteze și deschid câmpuri de analize mai profunde.

Remarcabil este faptul ca puse pe cheile de descifrare date de fractoloni, se poate înțelege complexitatea prin utilizarea experienței umane directe. Acesta este apanajul fractalilor algebrici, care sunt semantici si permit evaluarea inefabilului nu doar a măsurabilului.

BIG BANG, BIG CRUNCH

Totdeauna ne-au fascinat începuturile si „geneza”. Biblia arata doua începuturi: „ La început a fost lumina” si „La început a fost cuvântul”. Fractalii algebrici generează o structura ce poate fi descifrată.

CONCLUZIILE SUNT URMĂTOARELE

Genomul universului care este un tabel cu linie si coloana principala, arata ca genomul este stabil si veșnic, deci Dumnezeu este veșnic

Informația circulantă arata că viața se însămânțează in spațiu

Concatenarea pe un buton arata structurile toroidale ce se găsesc in spațiu

Concatenarea pe doua butoane, ne descrie conectoarele ce se obțin prin împachetare
Torusurile se aranjează in spirale Fibonacci

Spiralele Fibonacci le găsim la formele de viață

Deoarece in genomul universului si in toate formele de structuri informaționale descrise aici exista funcționalități clare, rezulta ca sunt veșnici ca spirit, chiar daca se schimba hrana fizică

Deoarece spiralele Fibonacci se formează adunând ultimele doua cifre pentru a găsi pe următoarea, rezulta ca evoluam in permanență

Toate aceste etape au fost generate de aplicația generată de intervenția lui DUMNEZEU in mintea noastră

Concluzie

Suntem in aceasta etapă din judecata de apoi, ce conduce la schimbarea comportamentelor aberante si a degradării mediului natural. Aceasta judecată este atât individuală cat si colectivă, instituțională si genetică. Este necesară spiritualizarea si armonizarea comportamentală pentru a transforma planeta într-un rai si a evita transformarea sa într-un iad. Depinde de fiecare dintre noi sa dezvolte altruismul si armonia sufletească pentru obținerea luminii sufletului si a minții.

Pe de altă parte dacă urmărim „fine tuning”

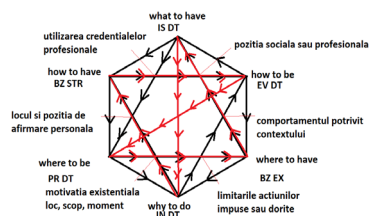

https://www.youtube.com/results?search_query=fine+tuning

Descoperim ca nimic nu este întâmplător. Cu toate acestea putem avea impresia că ce se întâmplă nu are consecințe. SE poate urmări cum introducerea lui DUMNEZEU in ecuație, schimba complet desfășurarea evenimentelor. Dacă se introduce DUMNEZEU in ecuație de la început se ajunge la rezultatele inimaginabile, descoperite de colegul meu Popescu Adria Marin <https://qdl-clone9.web.app/arrows>. Depinde de fiecare dintre noi să refacem toate echilibrele necesare pentru a transforma iadul in devenire in rai dumnezeiesc.
